

# Parking Lot Striping/Sweeping

## Striping Services

Parking lot striping is one of the simplest yet most important services that **All Lawn Care** provides. Clearly marked stalls, handicap spaces and directional arrows all make for more efficient, problem-free parking and are critical elements in maximizing parking lot space and smoothing the flow of lot traffic. We also ensure the striping is compliant with the Americans with Disabilities Act which will lower owner liability.

At **All Lawn Care**, we begin by making sure that the surface on which the markings will be placed are free of moisture, dust and debris. All of these will cause paint to lose its adhesive properties prematurely and flake. The paint is then applied with particular attention to both the thickness of the paint and width of the stripe so precise and uniform lines result. **All Lawn Care** utilizes airless striping equipment which provides crisp, clean edges on our lines and reduces waste and pollution from overspray.

**All Lawn Care** uses water-based paint. Water-based paint dries relatively quickly, usually within 5-10 minutes of application. Glass reflective beads are also available for reflective purposes if necessary.

## Sweeping Services

**All Lawn Care** provides complete parking lot cleaning and sweeping services for commercial properties using both sweeper trucks and hand labor for blowing off sidewalks, around curbs, curb stops and immovable objects. From malls and shopping centers to office/industrial parks, parking structures and parking lots, our team of professionals will keep your parking areas clean from unsightly dirt and debris. It will make a good impression on your customers and help keep your interior spaces free from tracked in grit and other dirt.

ARE YOUR PARKING AREAS THIS CLEAN ?

**Your professional source for pavement cleaning, power washing, striping and related services throughout the state of Connecticut!**
